Subject: Draft RSD (Remote Sensing Device) Report on Ability to find potential "high emitters"
Attachments: OnRoad_VW_Colorado v4_CRF.DOCX

To All,

This is a draft internal report only on EPA's analysis pertaining to RSD data from the State of Colorado's LDV/LDT and are ability to find vehicle groupings that might be potentially a "high emitter" group. A vehicle group is defined by six parameters (MY, Make, Model, Manufacturer, Engine size, and Fuel Type).

This report is for internal use only and we hope in the future to work together with CARB's to be able to produce this report every year plus expand the analysis to other areas. (See conclusions and recommendations)

Any and all comments from your review are welcomed. **I would like to have comments submitted by July 21, 2017.**

Thanks
